

Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
October 15, 1983

Released for Printing:
October 21, 1983

Highlights

Figure 1. Production of Bituminous Coal and Lignite, 1983 (Million Short Tons)

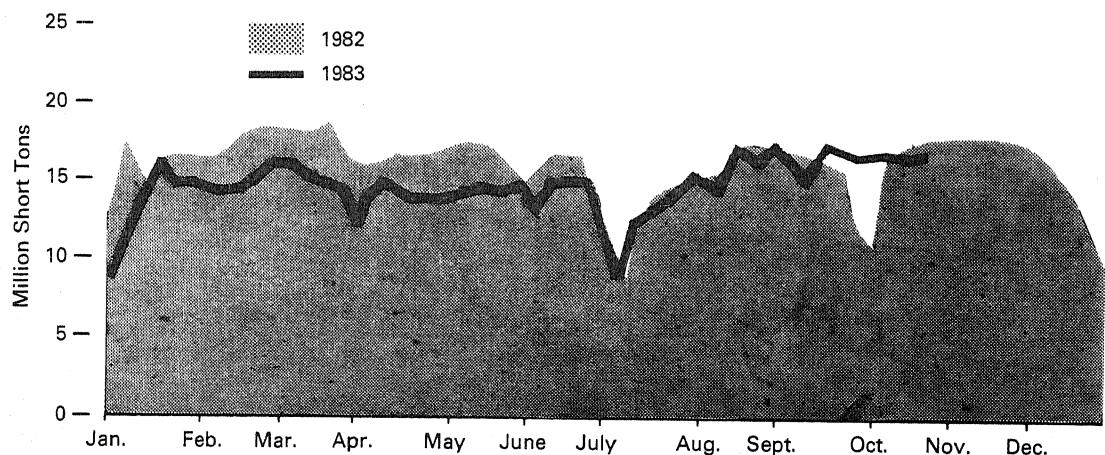

Table 1. Production of Bituminous Coal and Lignite (Thousand Short Tons)

| | Week Ending | | | Year to Date | |
|----------------------------|-----------------------|----------------------|----------|-----------------------|-----------|
| | 10/15/83 ^a | 10/8/83 ^a | 10/16/82 | 10/15/83 ^a | 10/16/82 |
| Total Production | 16,671 | 16,485 | 16,955 | 604,466 | 674,366 |
| Railroad Carloadings | 109,396 | 109,258 | 113,380 | 4,099,479 | 4,569,024 |

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
